

COMPANY PROFILE

Evidence for Progress

Research & Data Solutions for Malawi

■ WHO WE ARE

CK Data & Analytics is a Malawian research and data solutions firm combining fieldwork capability, statistical rigor, and digital technology under one roof. We work with government institutions, NGOs, development partners, and private sector clients to turn questions into evidence, and evidence into decisions.

OUR VISION

Leading Research in Malawi

To become a leading Malawian research and data solutions company providing reliable information and insights that support effective decision making and national development.

OUR MISSION

Transforming Data into Knowledge

To collect, analyze, and transform data into valuable knowledge through professional research, statistical expertise, and technology driven solutions that serve Malawi and the wider region.

■ WHAT WE DO

Research Services

Surveys, baseline studies, endline evaluations, market research, and community assessments.

Data Collection

Field data collection using digital tools, enumerator training, and rigorous quality verification.

Data Processing & Analysis

Data cleaning, statistical analysis, visualization, and professional reporting.

Technology Solutions

Online survey systems, custom data platforms, and client dashboards built for your workflow.

■ WHY CK DATA & ANALYTICS

Malawian organizations need reliable, locally grounded data for planning and decision making. Access to quality research services is often limited and expensive. We exist to close that gap.

THE CHALLENGE	OUR SOLUTION
Limited access to quality local data	On the ground field collection by a qualified team
Expensive research services from external firms	Competitive, locally priced packages
Poor data collection processes	Standardized digital tools and methodology
No combined statistics and technology expertise	Integrated research, analytics, and technology

■ WHO WE SERVE

Government Institutions	Surveys, research studies, and data analysis support
NGOs & Development Partners	Monitoring and evaluation, baseline studies, community data
Private Companies	Market research, customer surveys, business analysis
Academic Institutions	Research support, data analysis, and publications
Health Sector	Health data, facility surveys, community assessments

■ HOW WE WORK

01

Build reputation before revenue

Credibility is our most important currency. Quality work speaks louder than any marketing.

02

Quality over quantity

One excellent report published publicly is worth more than ten mediocre ones.

03

Systems over dependency

The company functions even when one person is unavailable, through documented process.
